DISCOVERY KITS

The new limited-edition Discovery Collection 2020 has been designed to meet the skincare needs of those who are always on the go. While ideal for weekenders, travellers, and vacationers, the 4-step kits are also the perfect at-home companion for first-time [comfort zone] users to experience a selection of best sellers.

In convenient and portable sizes, the new collection has 5 unique regimens, each designed for specific skin needs including dehydrated, mature, and sensitive skins, as well as a kit for relaxation and a special additional 'Must-Haves' kit featuring the brands most-loved products. Each selection features a complete regimen, enough for 1 or 2 weeks of use.

The formulas are developed and produced in the [comfort zone] research laboratories in Parma, Italy at Davines, a Certified B Corp and follow the CONSCIOUS SKIN SCIENCE™ approach. They are made from a high percentage of natural origin ingredients and are free from silicones and animal products. All packaging components are recyclable and fully CO2 compensated through the Ethiotrees initiative, supporting reforestation and social evolution in Ethiopia.
